

Predictions

Upload your predictions for each of the three chromosomes separately as three zipped tsv files. Name them chr3.tsv, chr10.tsv, and chr17.tsv . Recall the format:

chr	start	end	ATAC	CTCF	REST	EP300
-----	-------	-----	------	------	------	-------

chr3	12200	12400	U	0.2	0.3	0.0
------	-------	-------	---	-----	-----	-----

chr3	12400	12600	U	0.1	0.5	0.1
------	-------	-------	---	-----	-----	-----

chr3	13400	13600	U	0.2	0.1	0.2
------	-------	-------	---	-----	-----	-----

:

chr3	632600	632800	B	0.1	0.1	0.3
------	--------	--------	---	-----	-----	-----

chr3	632800	633000	B	0.6	0.4	0.1
------	--------	--------	---	-----	-----	-----

chr3	3015400	3015600	B	0.2	0.1	0.01
------	---------	---------	---	-----	-----	------

Also remember that all regions with N in them should be ignored, but keep them in the prediction file with an "NA". So ensure that the number of lines in the *bins_unknown.tsv files match with your prediction files.

You may continue to change your files until Tuesday April 7. I will take the latest files and use them to enter the auPRC in this [table](#). You will see the results on Wednesday April 8, which you can use for your presentation. The same table has the schedule for the presentation. If you plan to swap with another team, email me that with a cc to your teammate and the team with whom you are swapping.
